Let's get a draft going under whatever file number would be appropriate now. This is not an emergency need, but rather a project someone could get started on now.

Scott

I reviewed the EC re UAV SOPs. We should probably generate an updated version of it since in addition to having the wrong classification, it also has outdated information. I am not sure if we can just change the classification since it was serialized over 2 years ago.

Let me know.

Are the sections in the 2011 BAR and 2013 BAR regarding UAVs consistent? If not, what are the differences? Also, for the Hill briefing on Friday, how many trained and certified UAV operators does CIRG have? I know you don't have any full-time operators, but I am trying to put brackets around the total number of trained operators in the FBI. Thanks.

We are not in a position to establish UAV protocols yet. Field Flight Operations Unit has a tentative plan to field the UAS [REDACTED] by the end of the fiscal year. They hope to establish a "train the trainer" program and certify several flight instructors by the end of February, then develop a pilot training curriculum. I'll keep you posted. Let me know if you have any questions.

Thanks,
